

SATYA VINOD KANTIPUDI

(945) 209-4086 | vinodkantipudi1510@gmail.com

EDUCATION

University of Texas at Dallas

Richardson, TX

Master of Science in Business Analytics GPA 3.80/4.0

May 2024

Recognized as a **Scholar with Distinction** for outstanding academic achievement in the Business Analytics department.

Relevant Coursework: Big Data, Business Data Warehousing, Cloud Computing, DBMS, Data Visualization, AWS Solutions Architect.

WORK EXPERIENCE

CENTER FOR BRAIN HEALTH

Dallas, TX

Data Engineer

February 2023 – January 2024

- Architected Amazon RDS PostgreSQL database to manage analytics data, achieving enhanced data processing by reducing batch processing speed by 3 times and ensuring high availability.
- Designed and implemented 15+ scalable ETL jobs leveraging Apache Spark, transforming data across 100+ tables from S3 raw zone to refined zone in batch mode.
- Implemented complex CTEs to optimize complex multi-table joins. This resulted in a 2x reduction of query run times by preprocessing and filtering data before the main query execution.
- Enhanced data efficiency by employing Apache Hudi for UPSERTS and incremental processing, reducing data latency and enabling real-time Change Data Capture (CDC) for a 5 TB data lake.
- Collaborated with cross-functional teams including data scientists, and product managers to align data engineering solutions with business objectives.

UPWISERY

Hyderabad, India

Data Engineer

May 2021 - July 2022

- Designed a scalable ETL pipeline using Apache Spark and Python, resulting in a 30% improvement in data processing efficiency.
- Developed and maintained complex SQL queries and stored procedures to extract, transform, and load data from various sources, optimizing query performance by 25%.
- Automated data workflows using Step functions, streamlining data ingestion, processing, and reporting processes, leading to a 20% increase in team productivity.
- Designed and implemented data lake solutions on AWS, utilizing S3 for storage and Redshift for analytics, which improved data accessibility and query performance by 2 times.
- Conducted data validation and implemented data quality checks using AWS Glue, reducing data inconsistencies by 40%.

ACADEMIC PROJECT EXPERIENCE

Reddit Data Analytics Pipeline

- Designed a scalable ETL pipeline to ingest data from the Reddit API, using AWS Step Functions to orchestrate data extraction at scheduled intervals, processing and transforming raw data with Glue ETL jobs using Spark, and loading it into an Amazon Redshift data warehouse for efficient querying.

Host a WordPress Website on AWS

- Designed and implemented a scalable WordPress website architecture on AWS, utilizing VPC setup, EC2 instances, NAT gateways, RDS, EFS, Application Load Balancers, and Route 53 for high availability and security.

Build a Serverless Web Application using Generative AI

- Developed a serverless web application with AWS Amplify and Amazon Bedrock, utilizing the Claude 3 Sonnet foundation model to generate AI-driven recipes based on user-provided ingredients, ensuring seamless integration and dynamic content generation.

SKILLS

- **PROGRAMMING LANGUAGES:** Python, R, SQL, Linux, Shell Scripting.
- **BIG DATA:** Apache Hadoop, MapReduce, Apache Spark, Hive.
- **AWS SERVICES:** S3, Lambda, Athena, IAM, RDS, Glue, Step Functions, EMR, Redshift, Quick Sight, EC2, API Gateway, VPC.
- **INTERPERSONAL SKILLS:** Customer-focused, Effective Communicator, Highly Adaptable

CERTIFICATIONS

- **AWS Certified Solutions Architect Associate** Achieved January 2024
- **AWS Certified Cloud Practitioner** Achieved November 2022
